PROFESSIONAL SUMMARY

Results-driven Agentic AI Developer and AI Automation Architect with 4+ years of experience building intelligent, self-sustaining business systems. Specializing in autonomous AI agents, n8n workflow orchestration, LangChain RAG pipelines, and OpenAI API integration. Proven track record of saving clients 20+ hours per week, eliminating lead leakage with 24/7 conversational AI agents, and scaling business operations without increasing overhead. Currently pursuing B.S. Computer Science at MITE while delivering production-grade AI automation solutions for startups and SMBs globally.

PROFESSIONAL EXPERIENCE

AI Automation Consultant & Developer | Innoventix360

Nov 2025 – Present

Remote | AI Agents & Workflow Automation

- Architect and deploy autonomous AI agents using CrewAI and LangGraph frameworks to execute multi-step business processes with minimal human intervention
- Build sophisticated automation pipelines in Make.com and n8n, connecting disparate APIs and databases to streamline end-to-end business operations
- Implement advanced RAG systems and prompt engineering to ensure AI outputs are context-aware, accurate, and aligned with specific business logic
- Develop custom webhooks and logic bridges to sync data across CRM, project management, and communication tools including Slack, Notion, and HubSpot
- Monitor and refine agent chains to reduce latency, manage token costs, and improve reliability of automated decision-making pipelines

SEO & WordPress Developer | TechTalks.Pk

Apr 2025 – Jun 2025

Remote

- Scaled digital footprint by merging technical WordPress development with data-driven SEO strategies, improving SERP rankings significantly
- Optimized Core Web Vitals through advanced caching, database optimization, and asset minification, reducing page load times and bounce rates
- Structured site hierarchy and metadata to enhance crawlability and align content with search intent for improved user engagement
- Utilized Google Search Console and Analytics to track performance metrics and execute iterative, data-driven improvements

Web Developer | IIT Solutions

Mar 2024 – Aug 2024

Qasimabad, Sindh, Pakistan | Internship

- Built a fully functional educational website from scratch leveraging PHP for server-side logic and MySQL for data management
- Integrated trending UI/UX techniques and smooth animations to enhance user retention and engagement across 5 key pages
- Implemented mobile-first responsive design principles ensuring seamless experience across all device types

Web Developer | CodSoft

Nov 2023 – Jan 2024

- Developed and styled responsive, mobile-first websites using HTML, CSS, and JavaScript
- Built customizable CMS architectures using WordPress with specialized plugin integrations
- Applied SEO fundamentals and performance optimization to ensure site speed and search visibility

TECHNICAL SKILLS
